

CLIVORA 3.8.0 — Release Notes & Roadmap

Build: Android 3.8.0+80 · Web mirrored to clivora-web → <https://clivora.codcrafters.org>

Date: 2026-07-14

What we shipped in this build

Website (production UX)

- **Logged-in marketing nav** — When signed in, header shows Dashboard / Open portal / Sign out instead of Login + Get Started Free.
- **Sticky portal sidebars** — Freelancer and Client AppShell sidebars are fixed like Admin (sticky top-0 h-screen); only the nav list scrolls.
- **Freelancer dashboard** — Layout closer to the target mockup: KPI row, earnings + activity + week overview, projects/clients/proposals, AI banner, Connect opportunities, and **Post a need** quick action.
- **Post a need vs Post a job** — Freelancers post a **need**; clients post a **job**. Sidebar CTA, command palette, Connect board, and Manage page all use role-correct labels.
- **Connect Manage inside portal** — /app/connect/manage uses the same AppShell chrome (legacy /connect/manage redirects).
- **Full proposal / contact page** — /app/connect/apply with cover letter, approach, milestones, amount, timeline, portfolio links, and a **URL safety notice** (links may be analyzed; abusive profiles can be removed).
- **Hire flow** — Client posts job → freelancers browse Connect → Contact or Submit proposal → proposals inbox. Pro Plus gating preserved.
- **Messages** — Unified inbox/thread layout with denser conversation list and full-height workspace.

Android (3.8.0)

- Freelancer command-center order (agenda / queue first).
- Connect trust strip + pending Inbox count.
- Client unread message badge.
- Role-aware **Post need** / **Post job** labels on Connect screens.

Plan gates (aligned Free / Pro / Pro Plus)

AreaFreeProPro Plus	CRM clients / projects / invoicesCaps (3 / 5 / 10/mo)UnlimitedUnlimited
Connect marketplaceLockedLockedOpen + credits	Publish job/need / proposals / contact——
Credits (1–3) AI Hub / advanced analyticsLimitedUnlockedUnlocked	

Web uses the same product rules via `plan.ts` , `plan-gates.ts` , and Connect Pro Plus checks.

Download artifacts

- APK: see GitHub release / `/opt/cursor/artifacts/clivora-3.8.0.apk`
- AAB: `/opt/cursor/artifacts/clivora-3.8.0.aab`
- Live web: <https://clivora.codcrafters.org>

Recommended next improvements (research-aligned)

- Stripe web billing portal (keep `/pro` until live).
- Meilisearch Connect discovery + saved search alerts.
- Formal proposal → contract → milestone workroom end-to-end on mobile UI.
- Admin write actions: impersonation, bulk moderation, feature flags UI.
- Real chart history from DB (replace demo-scaled sparklines).
- Time-entry cloud sync to `crm_time_entries` .
- Branded client portal approvals + sticky payment CTA.

Governance

Keep escrow release rules, ranking weights, fraud heuristics, RLS details, and internal prompts private. Public docs should describe user-visible flows only.
